

CABINET VISION

Press Release

CABINET VISION Subscriptions Now Available

Planit Canada is pleased to offer subscription-based licensing for CABINET VISION software. Subscriptions allow users to tap into CABINET VISIONS' possibilities and tools through regular monthly payments. No long-term commitment or up-front investment is required.

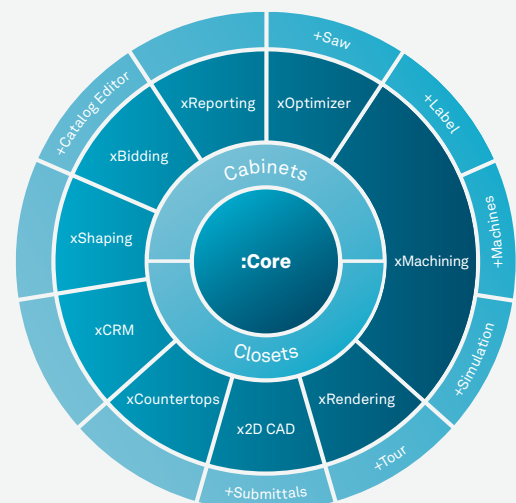

CABINET VISION flexes with production

“With this new pricing model, shop owners and designers can treat their software as an operating cost rather than a larger upfront investment. This approach will help manufacturers deal with production spikes through low-risk access to added licenses.” – Peter Mate, Planit Canada President.

The upside of subscription-based pricing

While clients can still invest in licenses with feature options tailored to their operation, the new subscription packages provide a robust, entry-level gateway into CABINET VISION's capabilities, 12 months at a time. Version updates, software maintenance, and eSupport are included in the base monthly price.
